Dr. Raymond R. Roepke
Department of Chemical Pharmacology
Lederle Laboratory
Pearl River, New York

Dear Ray:

May I ask the favor of a sample of from one to ten grams of 3-amino-1,2,4-Triazole, which is discussed in Dr. Frederick T. Wolf's article on 'Growth Inhibition of Chlorella Induced by 3-Amino-1,2,4-Triazole, and Its Reversal by Purines: In Nature 193:901-2, for use in studies on purine metabolism of bacteria. Do you happen to have any other information?

Sincerely,

Joshua Lederberg
Professor of Genetics
